MELTDOWN (1 x 45 of 8)

**Rockhopper TV
BBC/PBS**

For "Hot Cities", a landmark series on climate change. Documentary which looks at the repercussions of the global threat of climate change and glacial melt by following a team of glaciologists working 5400 metres above sea level in the Peruvian Andes and seeing how the inhabitants of Lima are coping as their city dries out. In Adelaide, Australia it may already be too late to win the battle against dehydration.

- Filmed on EX1
- Filmed in very extreme conditions at high altitude (5400 m above sea level) and minus 13 at night...inside the tent. The route to the glacier was a near vertical slope that had to be scaled with crampons, harnesses and ropes, in a snowstorm and force 10 gale
